Mangaluru, Karnataka, India

EDUCATION

Canara Engineering College Mangaluru, Karnataka, India
Bachelor of Engineering in Computer Science and Engineering — 8.44 CGPA 2023 – Present

TECHNICAL SKILLS

Cybersecurity: Linux (CLI), Network Fundamental, Wireshark, API Security Basics, Kali Linux
Programming: Python, C, Java
Web Technologies: HTML5, CSS3, React
Databases: MongoDB, Supabase
Developer Tools: Git, GitHub, VS Code, Docker (Containerization & Environment Simulation)
Cloud Platforms: Google Arcade, Vercel, Render, Streamlit Cloud

PROJECTS

- KeySense - AI-Enhanced Pre-Commit Secret Scanner** | *Node.js, React, Tailwind CSS, Git Hooks* May 2026
- Engineered a Git pre-commit CLI tool that automatically intercepts and halts commits containing exposed credentials, such as database URIs and cloud keys.
 - Implemented a Shannon Entropy engine to evaluate string randomness, filtering mock data to significantly reduce false-positive alerts.
 - Designed a stateless reporting architecture using Base64-encoded URL parameters, guaranteeing zero data-at-rest vulnerabilities locally.
 - Integrated contextual terminal tutorials for remediation and a custom React web dashboard to visualize live analytics.
- Posture AI: Intelligent Posture Detection and Feedback Tool** | *MERN, TF.js, WebRTC* 2025 – 2026
- Developed a web-based application utilizing TensorFlow.js and MoveNet pose estimation to provide real-time posture analysis and form correction across six exercise types.
 - Engineered a trainer dashboard capable of monitoring 20+ concurrent trainees remotely, integrating WebRTC for peer-to-peer video streaming and Socket.IO for real-time data transfer.
 - Implemented custom algorithms to calculate joint angles and detect movement phases, achieving 90–94% accuracy at 15–20 frames per second using standard webcams.
 - Integrated voice-guided feedback, Jitsi Meet, and automated PDF report generation to deliver professional-level fitness guidance without expensive hardware.
- EduBot - AI-Powered College Assistant Chatbot** | *Python, Streamlit, Gemini 2.0 Flash* Nov. 2025
- Developed an intelligent web-based chatbot integrating Google's Gemini 2.0 Flash API with a JSON database to streamline access to academic schedules and campus events.
 - Optimized API token management and resolved complex state synchronization issues to successfully handle 150+ daily personalized queries within free-tier constraints.
 - Deployed on Streamlit Cloud using GitHub CI/CD, reducing information retrieval time from 15+ minutes to under 2 seconds while maintaining 24/7 availability.

ACHIEVEMENTS AND EXPERIENCE

- 1st Prize, Mini Project Expo (Dec 2025):** Led the development of 'PostureAI', an intelligent real-time monitoring system, securing first place in the Computer Science and Engineering Department at Canara Engineering College.
- Open Source Contributor (Oct 2025):** Participated in Hacktoberfest 2025, collaborating on GitHub repositories, reviewing code contributions, and maintaining secure version control workflows.

CERTIFICATIONS

- Python from Zero-to-Hero** – Udemy (Aug 2025)
- C Programming Course** – Infosys Springboard (May 2024)
- Foundations of Cybersecurity** – Google & Coursera (May 2024)
